

# Fine Motor Items for Play: School Based & Pediatric Occupational Therapy Resource: School Based & Pediatric Occupational Therapy Resource Series - Volume 6

Basic, pictured fine motor tasks designed for daily use for your child and/or student. Each task is aligned with fine motor and sensory performance skills and can be adapted for various age and ability levels. A calendar for reference is provided to incorporate into intervention plans. This is a clinical resource book for school based or clinic based occupational therapists. The materials created are actual materials used by Dr. Kelley in her practice and have been integrated as part of her practice for over fifteen years. Dr. Kelley has divided her focus for each book into areas of focus for the therapists. Reflecting the Occupational Therapy Practice Domain (AOTA, 2008), the activities seek to address components as they are outlined in the Domain. As a collaboration of many resources, experiences and personal development, the OT Resources Series is designed by an OT for an OT.
