

A Creative Step-By-Step Guide to Garden Design (Sbs Series)

Offering even the most hesitant gardeners the opportunity to make their own decisions about the way their garden is going to look and function, this book uses simple easy-to-make model representations of all the major components that make up a garden, such as lawns, patios, beds, paths, etc. and clear step-by-step demonstrations of how these components can be arranged to produce different designs. The result is not only highly instructive but also makes compulsive viewing.
