

Building on UNAM: Design with Historic Architecture--Columbia GSAPP Joint Studio, 2004

This studio catalogue represents the work of advanced graduate students in design and historic preservation at Columbia University. The campus of the Universidad Nacional Autonoma de Mexico offered the opportunity to explore together the paradigm of design with historic buildings and led to the creation of new works that combine new and old architecture. The full-color catalogue includes analysis of the existing buildings, an overview of the history of UNAM, and documentation and criticism of the new proposals.
