

Acls Case Studies: Emergency Room Department

This is true ACLS case-based learning your video patient reacts to your interventions as you learn. Ten video simulations on each CD test the ACLS student on the nine AHA core algorithms -- plus a Mega Code scenario that's never the same code twice! Challenge your ACLS skills by choosing the right treatment protocol at each decision point. Bad decisions cause the patient to drastically worsen or to expire! The user is then returned to the point at which the error was made, to try again. There's an ACLS Case Study Simulation for each major ACLS environment.
