

Sickness, Health and Medicine (Sociology in Focus)

This book is taken from a series of short topic books which are designed to cover the requirements of A level sociology syllabuses. Each book is written by a specialist in the area and contains a selection of readings and documentary extracts, including statistical and quantitative data where relevant, as well as textual analysis. This book provides explores the relationship between health, illness, medicine and society, beginning with an analysis of the reasons for the rise of scientific medicine in Western society.
