

Histology and Cell Biology: Pretest Self-Assessment and Review (Basic Science Series)

This title provides medical students as well as physicians with a comprehensive instrument for self-assessment and review within the medical specialty of histology. Each title in the series contains 500 questions designed to parallel the format and degree of difficulty of the questions contained in Step 1 of the USMLE examination. Each question is accompanied by an answer, a paragraph-length explanation and a specific page reference to either a current journal article, a textbook or both. A bibliography lists all sources used, and follows the last chapter of each title within the series.
