

Cartier Design Viewed

The original designs are not displayed, but are featured in the scenography as huge photographic enlargements that, for Ettore Sottsass, conjure up the idea or thought: behind the object. Nevertheless, he felt it was important that the catalogue reflect the jewelers graphic world. this book contains a selection of designs chosen in synergy with the layout of the exhibition. The combination of actual-size reproductions with enlargements makes it possible to see the act of creation, circumscribed by the ratio of I and the correct proportions it generates, in close relation to the graphic or pictorial technique, which monumentalizes the object or piece of jewelry - thereby mirroring Ettore Sottsass architectural vision. The pieces chosen showcase production drawings that illustrate the unique relationship between design and material. All designs reproduced here are from the Cartier Paris Archives.
