

Clinical Manual of Contact Lenses

Now in its thoroughly revised, updated Second Edition, this manual is a complete, current, and convenient how-to guide to fitting and caring for contact lens patients. The book is the perfect quick reference to consult during a patient's examination and a user-friendly study guide for boards. Sections on rigid (hard) and hydrogel (soft) lenses cover selection, fitting, lens care and patient education, verification, and problem-solving. This edition's Challenging Cases section features three new chapters on keratoconus, post-surgical fitting, and orthokeratology and also covers astigmatism, bifocal contact lenses, extended wear, aphakia, and management of lens-associated pathology. The book is organized so that readers can locate any topic without having to read the whole chapter. Each chapter includes clinical cases, nomograms, and a Clinical Proficiency Checklist that summarizes key points students must know for boards. Nearly 200 illustrations complement the text.
