

## Accident and Emergency Medicine (Colour Guide)

This text is a new title in the Colour Guide series, which replaces the Colour Aids series. The book is aimed at medical students, medical staff and paramedical staff (including first aiders) who may be involved in the treatment of emergencies in medical or surgical practice. It demonstrates the most common conditions seen in an accident and emergency department. In addition, the commonly missed or mis-diagnosed problems and x-rays are pointed out.
