

# Construction Cost Planning

Contractors: How to win design/build projects, lower bid price yet increase profit, design/build low cost projects, and apply simplistic cost control. Property Owners: How to plan your project and retain full cost control at all times, to design projects cheapest to build and own, and always environmentally sound. Architects and Engineers: How to maximise your design creativity, guarantee an efficient design office, and possess the ideal design solutions and accurate cost prognosis at the Planning Phase. The Community: How to prevent your local government subsidising property developers and their unwanted developments paid with your tax money, how to stop developments that are environmentally a disaster, and how to prevent your down town and facilities become increasingly shabby.
