

## Religions, Rights and Laws

The central concern of this book is the interaction between the idea of religious freedom and the regulation of a modern state by laws. Hence it primarily addresses the structure of and reasons for the legal order rather than describing legal rules. It is a book about law rather than a mere law book. The author begins by examining the nature of religion, the differences between religious and secular philosophies and existing notions of rights. In Part 2 he illustrates the relationship between legal rules and religion by means of case studies: the laws applying the conscientious objection to trade union membership, religious education in schools, Sunday trading, religious slaughter, charities and blasphemy. Part 3 ponders the links between freedom of belief and freedom of practice, discusses the idea of legislation against religious discrimination and concludes with a discussion of the prospects for religious freedom under the law. Although practising and academic lawyers will obviously find this book useful, it will also be valued by students and teachers of religious studies, sociologists and philosophers.
