

Fundamentals of Pathophysiology: Disorders and Alteration in Renal Function

This audio book on CDs provides an easy way for students to review a list of key terms and concepts of pathophysiology. It truly offers the most comprehensive and easy accessible supplement to your independent study for the final exams as well as for the Board exam. Topics covered: Control of Renal Function; Kidney Structure and Function; Renal Blood Supply; The Nephron; The Glomerulus; Tubular Components of the Nephron; Urine Formation; Glomerular Filtration; Tubular Reabsorption and Secretion; Proximal Tubule; The Loop of Henle; Distal Convolved Tubule; Late Distal Tubule and Cortical Collecting Tubule; Medullary Collecting Duct; Regulation of Renal Blood Flow; Neural and Humoral Control Mechanisms; Autoregulation; The Juxtaglomerular Complex; Effect of Increased Protein and Glucose Load; Elimination Functions of the Kidney; Renal Clearance; Regulation of Sodium and Potassium Elimination; Aldosterone; Atrial Naturetic Peptide; Regulation of pH; Uric Acid Elimination; Urea Elimination; Drug Elimination; Endocrine Functions of the Kidney; The Renin-Angiotensin-Aldosterone Mechanism; Erythropoietin; Vitamin D; Tests of Renal Function; Urinalysis; Glomerular Filtration Rate; Blood Tests; Serum Creatinine; Blood Urea Nitrogen; Cystoscopy; Ultrasonography; Radiologic and Other Imaging Studies; Physiologic Action of Diuretics; Osmotic Diuretics; Inhibitors of Sodium Transport; Loop Diuretics; Thiazide Diuretics; Aldosterone Antagonists; Inhibitors of Urine Acidification
