

Global Advances in Human Caring Literacy

This narrative-based work is the first to describe Human Caring Literacy from the perspective of caring scientists who live the life by incorporating the precepts of human caring into every aspect of their personal and professional lives. It demonstrates, for nursing students and experienced nurses in a variety of roles, the abundant ways in which Caring Science theory powerfully informs the lives of nursing deans and faculty, APRNs, administrators, and frontline clinicians in the U.S. and globally.
