

Groundswell

Groundswell: Constructing the Contemporary Landscape presents 23 projects that reveal the surge of creativity and discussion surrounding the designed landscape in a broad, principally urban, international context. In the last 20 years, many significant new public spaces have been created for sites that have been reclaimed from conflict, environmental degradation, and abandonment. The projects, found throughout North America, Europe, Asia, and the Middle East, were selected for their outstanding design, and for their variety of contexts, materials, scale, and types of spaces. This fully illustrated volume includes an essay by Peter Reed, Curator in the Department of Architecture and Design at The Museum of Modern Art, that demonstrates how these innovative projects expand the definition of the modernist landscape while responding to a variety of conditions such as program, social function, and the transformation and reclamation previously industrial areas. The essay is followed by a full-color plate section featuring the selected projects. Catalogue entries for each project provide a succinct description of the site, its transformation, and design concepts illustrated by photographs, drawings, and models. Includes work by George Hargreaves, Martha Schwartz, Peter Walker, James Corner, Peter Latz, Ken Smith, Tom Leader, and others. Essay by Peter Reed. Paperback, 9.5 x 11 in./168 pgs / 300 color and 30 b&w.
