

# Haemodynamic Profiles and the Critically Ill Patient: A Practical Guide (Understanding Cardiac Output Studies)

This book is an accessible practical guide for all health care professionals responsible for the care of critically ill patients. The book reviews cardiac anatomy and physiology before describing the use of pulmonary artery catheters and the clinical application of haemodynamic profiles, using patient case studies. Haemodynamic Profiles and the Critically Ill Patient is an important information source for nurses, medical students and junior doctors in all critical care areas.
