

How to take care of our eyes: With advice to parents and teachers in regard to the management of the eyes of children

Excerpt from How to Take Care of Our Eyes: With Advice to Parents and Teachers in Regard to the Management of the Eyes of Children Though not the first work of the kind published, this little book is believed to be simpler, freer from technical terms, and shorter than its predecessors. These merits, it is hoped, may render it exceptionally popular, and therefore exceptionally useful. The growing prevalence of weak sight in this country, both in children and adults, would seem to make a wider knowledge of the eye, and how to take care of it, of some importance. A part of the book has already been published in the Atlantic Monthly. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
