

WELLBUTRIN (Bupropion): Treats Depression and Aids in Quitting Smoking; also Prevents Depression caused by Seasonal Affective Disorder (SAD)

Although, your health condition may impact your everyday life, do not let it define who you are. WELLBUTRIN (bupropion) is used to treat depression and to prevent depression in patients with seasonal affective disorder (SAD), which is sometimes called winter depression. It is also used as part of a support program to help people stop smoking. If you are already taking other brand of bupropion medicine for depression or to help you stop smoking, discuss this with your doctor before taking WELLBUTRIN. It is very important that you receive only one prescription at a time for bupropion. Bupropion is in a class of medications called antidepressants. It works by increasing certain types of activity in the brain. This medicine is available only with your doctors prescription. Thanks and may you have a good understanding about this drugWELLBUTRIN. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
