

## Manual of I.V. Therapeutics

The standards of both the Intravenous Nursing Society and the Centers for Disease Control are emphasized throughout this manual. The text keeps students up to date by detailing procedures for new practices including subcutaneous infusion of pain medication and epidural administration. A web-based interactive Instructors Guide provides information on how to use the book in various course formats, how to use the book and its accompanying CD-ROM to develop an online course, and answers to the questions and activities on the CD-ROM. Each chapter in the book covers: study outcomes; prerequisite knowledge; key concepts and learning strategies; innovative teaching strategies; multimedia suggestions; and critical thinking activities. The CD-ROM contains extra exercises, illustrations, equipment photographs and 300 multiple-choice questions for exam preparation.
