

## Dosage Calculations, 6E

The new edition of this best selling book presents the principles of calculating medication dosages using the formula method  $D/H \times Q=X$ . The expanded math coverage includes a pretest and post test section, two chapters of math review covering fractions and decimals, ratio and percent, simple equations, and ration and proportion. This revision also includes numerous new photos and illustrations of drug labels to familiarize users with information commonly contained on labels.
