

Metals in Americas Historic Buildings: Uses and Preservation Treatments

2d edition. Intended for use by owners, architects, and building managers responsible for the preservation and maintenance of Americas architectural heritage. Documents with photographs the metals most often used in American buildings. Examines how metals deteriorate, and illustrates techniques available to architects and conservators in preserving and maintaining the metal components of buildings. The metals discussed include: lead; tin; zinc; copper; nickel; iron; steel; and aluminum. Contains copyrighted material.
