However, MS onset in children accounts for up to 10% of all MS cases. **Pediatric Depression - EMedicine by MedScape** Drugs & Diseases > Pediatrics: General Medicine Almost half the worlds population lives in countries where the In parts of the world where malaria is endemic, it may cause as many as 10% of all deaths in children. The presence of more than one parasite in an erythrocyte is unique to this species. **EMED: Pediatric Trauma (Special Populations - Pediatrics) - Buscape** The eMedicine point-of-care clinical reference features up-to-date, searchable, peer-reviewed medical articles organized in specialty-focused textbooks, and is **Emed by Delmar Thomson Learning - Reviews, Description & more** eMedicine topic list. [edit on Wikidata]. Pediatric trauma refers to a traumatic injury that happens to an infant, child or adolescent. Because of anatomical and physiological differences between children and adults the care and management of this population differs. Children present a unique challenge in trauma care because they are so
