

Manual of Normal Histology; Adapted for the Use of Students in the Class Room and in the Laboratory

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 edition. Excerpt: ...one just beneath the visceral layer of the pleura, the other in the clefts in the fibrous tissue between the infundibula. The two sets communicate and terminate in the bronchial lymph glands. The mrczes are derived from the pulmonary plexuses which are formed by the pneunnogastric nerves and branches from the sympathetic system. The fibres possess ganglia, and accompany the branching bronchial tubes. Experiment 126. Stain and mount a section of the lung. Examine and notice the alveoli, the fibrous septa between the alveoli, and sections of bronchioles, and blood-vessels. Look for the lining cells of the alveoli and of the bronchioles. Sketch. If the section includes a bronchial tube, study its structure and sketch it. Exp, 127. Stain a section of the lung with silver nitrate. Look for the outlines of the lining cells; also stomata and stigmata. Exp. 128. Mount a section of an injected lung. Examine and notice the capillary network around the alveoli. Exp. 129. Open the thorax of a curarized or pithed frog, being careful not to injure the lungs. Notice the lungs distended with air; the air sacs and the capillary network of vessels. If necessary use an ordinary hand lens. CHAPTER XII. THE SKIN AND ITS APPENDAGES. The skin is divided into two zones, an outer zone, termed the cuticle or epidermis; an inner zone, termed the dermis, cutis vera (true skin), or corium. The epidermis is composed of stratified squamous epithelium, modified to withstand the influence of the atmosphere and violence, acting as a covering for the protection of the underlying dermis. On account of the modification of the epithelium, the epidermis is divided into layers or strata. The dermis is also divided

into strata, the division depending upon the disposition of...
