

# Standards for Perioperative Autologous Blood Collection and Administration, 4th edition and Guidance CD

The fourth edition of Standards for Perioperative Autologous Blood Collection and Administration contains requirements that address perioperative collection and preparation of red cell and non-red cell components. The fourth edition includes a table of perioperative component descriptions that promotes standardization of terminology. The Perioperative Standards also contains requirements addressing the use of new or novel methods and defines expiration times for a number of different perioperative products. AABB, 2009, soft cover, 62 pages, CD-ROM included
