

Sun, Wind & Light: Architectural Design Strategies, 2nd Edition

Architecture/Environment How to design buildings that heat with the sun, cool with the wind, light with the sky, and move into the future using on-site renewable resources Developed for rapid use during schematic design, this book clarifies relationships between form and energy and gives designers tools for designing sustainably. It also:

- * Applies the latest passive energy and lighting design research
- * Organizes information by architectural elements at three scales: * building groups, individual buildings, and building parts
- * Brings design strategies to life with examples and practical design tools
- * Features: * 109 analysis techniques and design strategies * More than 750 illustrations, sizing graphs, and tables * Both inch-pound and metric units
