

The Economic Era of Health Care: A Revolution in Organized Delivery Systems (Jossey Bass/Aha Press Series)

From traditional, health-oriented community care to the new era of bottom-line-focused medical treatment, this work presents the dramatic shift in modern US medicine. The implications are explored in a series of dialogues about the most recent changes in managed care, hospital governance, alliances between physicians and managers, and health care ethics: the problems to be solved, the threats that must be met, and the opportunities that lie ahead for those hospitals and physicians who are willing to challenge the status quo.
