

Managing the Patient-Centered Pharmacy

Focuses on the management decisions and processes needed to successfully implement a pharmaceutical care practice in both community and hospital pharmacy settings. This step-by-step guide integrates a patient care focus into its contents, and addresses the non-clinical aspects of practice into pharmaceutical care management. Developed by academics and practitioners from the United States, Canada, and Australia, the book provides practical advice on gearing up for pharmaceutical care, including evaluating customers needs, business planning, automation, financial systems, and cost containment.
