

## The Doctors, The Dictionary and The Deva.

So many names, so many changes since the Chester asylum opened in 1829 and closed in 2005. At its peak the hospital population exceeded 1800. the book is focused on individuals who at various times, either by relationship, interest or influence, have been connected with some of the hospital doctors. Also highlighted are the achievements of the medical superintendents, those who influenced the early history of the hospital, or the hospital community, notably Dr Thomas Nadauld Brushfield who was a strong advocate of change at the Chester hospital and later Brookwood asylum. He was also a renowned scholar and historian, and an expert on the life and times of Sir Walter Raleigh. Other featured superintendents include Dr John H. Davidson who travelled extensively and compiled detailed accounts of asylums and mental illness on the Continent, and Dr G. Hamilton-Grills who was the superintendent at Chester during both world wars, and completed 34 years service. Dr Hamilton-Grills niece was a deputy medical superintendent, and his nephew was the renowned psychotherapist, William Gillespie. Dr Gillespie and his sister both wrote learned papers on the study of post-encephalitis at the mental hospital. Remarkably, the hospital was served by only eight superintendents during a period of 136 years.
